## BYOND Activation Key X64

BYOND is a truly free program designed for Windows systems using a Javascript programming language. The program is available under the GNU General Public License v2. You will have to accept the license if you plan to use the application. The limitation is strictly enforced and monitored. The other important thing to know about BYOND is that it is built on top of the open source code named "Build Your Own Netdream", or BYOND for short. If you have become a BYOND member, you can take advantage of the networking features of BYOND and interact directly with any server that has been set up by other users. Key Features: ★ Multiple tabs for each game ★ App and game descriptions ★ Easy to use interface ★ Online gaming support ★ Complete teaming support ★ Invitation support ★ chat support ★ Customizable keyboard shortcuts ★ Basic Game Tools ★ Real-time multiplayer network support ★ Offline game store with browser support ★ In-game chat with profile/status display ★ 6-button Gamepad Support ★ Include icons for your own games ★ Customizable preferences ★ Customizable icons ★ Actions for Window / Full-screen mode ★ Support for multiple language (English, German, French, Spanish, Polish, Russian, Chinese (Simplified), and Chinese (Traditional)) ★ PDF manual ★ Translations for the game description, terms of use, and help ★ Translations for the help pages ★ Translations for the help pages ★ Translations for the help pages ★ Translations for the help pages ★ Translations for the help pages ★ Save & open games ★ Offline game store browser ★ Zooming support ★ Free positioning ★ Customize game shortcuts ★ Turn on/off sounds ★ Log off automatically at the end of the game ★ Full support for GD and GD2 Plugins ★ Use your own graphics (TGA, BMP, JPG, GIF, PNG, or Sprite) ★ Multiple games per account ★ Load Games directly from the disk ★ Number of games per server ★ Automatic update of the client when a new game is added to the server ★ Option to modify server settings ★ Network game server limitations (Time-out,...) ★ Sound-effects ★ Restriction ★ Translations for all pages ★ Localization ★ Support for the game interface (mouse) ★ Real time network game support

## What's New In?

BYOND is a free-to-use toolset that enables you to build and launch your own titles. The toolset has two main components: - The BYOND runtime system, which is only required to build your games. It's fully self-contained and doesn't require access to any internet services such as chat, email or internet browsers. - The BYOND editor, which is used to build your game using the official BYOND engine. When you launch the BYOND runtime, you are shown a login dialog. A valid username and password is required to login. If you already had a BYOND account on another machine, you'll be automatically logged in, otherwise you'll get a warning and be requested to create a new account. Once you have logged in, you will immediately be taken to the BYOND editor. It is a simple editor that consists of the following: - A high-level editor that enables you to drag and drop game objects to make up your game, and the editor automatically creates an ActionScript class for you based on the game entities you drag to the editor. - An editor for game entities, where you can add any game entity that already exists in the BYOND editor's game object hierarchy, or add new game entities. - A button that will launch your game, with a window where you can monitor and test your game. The BYOND runtime provides you with a number of ready-to-use components, such as a canvas, sprites, buttons, sliders, spritesheet images, text, and more. Use the button on the top right to spawn a new empty game, and all the ready-to-use components will appear in the game window. Using a button, you can: - Spawn a new standalone game. - Set up a new, customizable game. - Launch your game as a stand-alone app. - Install the game onto your local system to run it locally. When the game is running, you can control its behavior using the left and right sliders that appear at the top of the screen. You can drag and drop game entities by holding the mouse button down and moving the mouse, and the editor will automatically add event handlers that will perform the necessary code whenever the object is dragged to the editor. Entities can be dragged individually, or multiple

---

entities can be dragged and grouped together. To remove a game entity, hold the shift key while dragging the entity. After holding shift, there will be

---

## System Requirements:
