

Wow – this is a great addition to my collection. The instrument is nicely balanced and the details make a big difference. I like the combination of both natural and synthetic strings. It's a versatile instrument that can be played with both hands, but I'd still recommend you have a MIDI controller with you for some of the more complex parts. As with many other samples, some effects can sound a bit cold and synthetic. Overall, this is a great sample and I'm very happy with it. Keep up the good work.
